

Adapted FAP parent-child formulation

DRB1s: Problematic or maladaptive child behaviors:

DRB2s: Adaptive behaviors that represent potential alternatives to the child's maladaptive behaviors and/or would address current behavioral deficits. Consider the contexts in which the child engages in DRB1s:

DRB3s: Accurate and functional parent and child descriptions of child behavior and the causes of child behaviour:

Support the parent to:

- (1) Stop reinforcing DRB1s
- (2) Evoke, shape and reinforce DRB2s
- (3) Develop accurate and functional DRB3s
- (4) Support the child in developing accurate and functional DRB3s
